Entries in this Index are technical papers, short communications, award papers, educational reports, special papers, and topical articles. Algorithms are indexed separately; the "Index by Subject to Algorithms 1985" is on page 1258 of this issue. (Due to publication delays, the information on algorithms appearing in ACM's *Transactions* in 1986 was not available for this issue of *Communications*. Therefore, the 1985 algorithms index appears updated in this issue, and the complete 1986 algorithms index will run next year, with the 1987 *Communications* index.)

The KEY in each entry gives the year and volume number (8629), the issue number (which is also the number of the month), and the beginning page number.

The BIBLIOGRAPHY lists the entries in order of original appearance; each entry gives the title and the name(s) of the author(s).

The AUTHOR INDEX lists the entries in order of alphabetized authors' names. If there is more than one author for a paper, each author is listed separately in alphabetical order; therefore, in this section a single entry would not include coauthors' names.

A new SUBJECT INDEX to all articles is included for the first time this year. The INDEX is based on the *Computing Reviews* classification scheme and includes articles published in ARTICLES, REPORTS, COMPUTING PRACTICES, and RESEARCH CONTRIBUTIONS, as well as PROGRAMMING PEARLS, FROM WASHINGTON, SELF-ASSESSMENT PROCEDURES, and VIEWPOINTS, EDITORIALS, and PRESIDENT'S LETTERS.

ARTICLES; REPORTS; COMPUTING PRACTICES; RESEARCH CONTRIBUTIONS; EDITORIALS, VIEWPOINTS, AND PRESIDENT'S LETTERS; FROM WASHINGTON; The ACM FORUM; PROGRAMMING PEARLS; TECHNICAL CORRESPONDENCE; and OBITUARIES indexes list the year's entries in these respective categories.
